Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

1. Claim 2 is objected to because of the following informalities: On lines 9 and 11, after "constant", the "." should be changed to --;--. On line 12, "varing" should be changed to --varying--. On line 12, "realtion" should be changed to --relation--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 2, the preamble states "a process...comprising the steps of." However, the body of the claims do not recite any steps.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2643

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Waller, Jr. (US 5,263,091).

Regarding claim 1, Waller, Jr. discloses a process for generating a dc control signal (E_{DC}) from an input audio signal (E_{IN}) comprising the steps of:

deriving a level detected signal (via logarithmic converter 50 or 91);

providing a system threshold level (via maximum threshold reference 140);

means for clamping (the voltage on capacitor 82 is held to the most negative voltage at the buffer 70 output, without exceeding the maximum threshold reference; col. 3, line 47 – col. 4, line 15);

deriving a dc signal (threshold scale amplifier 150 converts the output at 80 to the proper voltage E_{DC} required to control the threshold of the noise reduction system; col. 4, lines 15-19).

Allowable Subject Matter

6. Claim 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

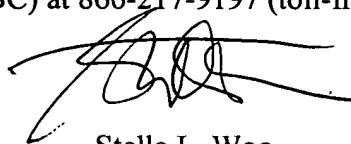

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Franklin et al. show the use of a voltage clamp for clamping a control signal (Figure 9; col. 13, line 64 – col. 14, line 6).
